SAFE, or Student Activists for the Environment

rev. 6/12
Students have varied abilities and interests. While we consistently differentiate our instruction to meet the needs of the spectrum of students throughout the District, we have also identified and provided additional opportunities and challenges for students to go beyond the classroom. Listed below are examples of these types of programs offered to students in the Peters Township School District.

Please note that this list is not all inclusive and our staff adds to the programs provided every year. If you have suggestions or questions regarding these programs, please contact your child’s teacher.

Grades K-3
Pleasant Valley School and Bower Hill Elementary
- Young Author and Illustrator Extraordinaire (Independent Choice)
- Logical reasoning sessions
- Advanced logic and problem solving session
- “Thinking Games” sessions- Blokus, Mastermind, Set
- Creative writing & language arts enrichment
- Independent research and project management
- Math enrichment and acceleration (4th grade level)

Grades 4-6
McMurray Elementary School
- Calcu-Solve Competition for Grades 5 and 6
- PA Math League Test (all sixth graders)
- Word Master Challenge (all fifth graders)
- Student Council
- Student Leadership Committees
- Morning News Broadcast (Grade 6)
- Stock Market Game- offered to fourth graders who are accelerated and during School- Wide enrichment in fifth, and to a few interested students in sixth.
- Submit Writing to Creative Kids Magazine for possible publication.
- Individual Student Options: Technology Projects, Science Projects, Inventing, Creative Writing, Problem Solving, Bridge Building, Puppet Making, Service Projects etc.
- Spelling Bee
- Service projects (Caring Tree and Pennies for the Planet were done by GS teachers)
- Renzulli Learning Projects
- Language Arts Enrichment -Students participate in activities to further develop reading, writing, spelling, and independent learning skills. These activities cover a broad spectrum including literature discussions, technology presentations, creative writing, and self selected projects. A professional enrichment team of teachers, facilitators, and the librarian develop an enrichment curriculum that focuses on creative and higher level thinking skills
- Small Group Enrichment -Students participate in activities to further develop reading, writing, spelling, higher level thinking, and independent learning skills. These activities cover a broad spectrum including literature discussions, technology presentations, science research, and creative writing.
- Math Acceleration -In addition to the enrichment provided within the math classroom, qualifying students are able to participate in above grade level curriculum. In order to advance to another grade level, students are screened using curriculum-based assessments and other available information. Students meeting the criteria are usually placed in an accelerated class with their chronological- age peers. A teacher in their current grade level teaches this class. At times, students are placed in a class at the next grade level or beyond .
- Independent and Small Group Projects- Students demonstrating additional needs for curriculum differentiation will have the opportunity to explore areas of academic interest through various independent or small group projects. Renzulli Learning System software and other technology resources are available.

Grades 7-8
Peters Township Middle School
- PA Junior Academy of Science
- Odyssey of the Mind
- Science Olympiad
- Carnegie Science Fair
- National History Day
- Forensics
