PETERS TOWNSHIP HIGH SCHOOL COURSE SYLLABUS: CYBER-SECURITY AND THE LAW

Course Overview and Essential Skills

Computers, the Internet, and mobile information technologies have become routine elements of our daily lives. The percentage of our social, professional, and political discourse mediated by information systems increases each year. Critical infrastructure likewise follows suit, with financial, healthcare, energy and other utilities leveraging the Internet to increase both capability and efficiency. In the physical world, we publish rules (laws) to govern our interactions with one another. In cyberspace, where these rules exist - and what they require - are less clear. This course explores questions surrounding how we "govern" cyberspace in the context of cybersecurity and privacy issues. We will examine a series of examples, both real-world and hypothetical, to investigate what policy "tools" are in-place, available, and *should be available* to address Internet security and privacy issues.

Course Textbook and Required Materials

- Computer (provided by school)
- Cyberlaw: The Law of the Internet and Information Technology
- Access to school technology digital storage

Unit or Topic	Concepts/Skills/Resources	Timeframe
Cyberspace Law	Background of course structure and information surrounding differences in cyberspace and reality	2 weeks
Copyright Law and Defenses	<u>Copyright and trademark. Establishing</u> grounds for defenses	<u>1 week</u>
Social Networking	Brief history of social networking. Burden of privacy within public networks. Evolving law and protections.	<u>2 weeks</u>
<u>Virtual Communities</u>	<u>Future Shock, Third Wave, Powershift</u> <u>- Online in Theory (Toffler)</u> <u>Establishment of Virtual Worlds</u> <u>Crimes in and within the virtual world</u>	<u>1 week</u>
Online Behavioral Advertising and Data Aggregation	Internet search queries Attempts to self-regulate Governmental regulations	<u>1 week</u>
<u>Financial Network Security and</u> <u>Identity Theft</u>	<u>Gramm-Leach-Bliley Act (189-190)</u> <u>Wire Fraud and Federal Wiretap Act</u> <u>(Title III)</u> <u>Identity Theft</u>	<u>1 week</u>
<u>Mobile Devices and Location</u> <u>Services</u>	<u>Mobile Device location services</u> <u>Power of smart phones and dumb</u> <u>people who use them</u>	<u>1 week</u>
Content Aware Computing	Cookies, history, and targeting	<u>1 week</u>
Privacy and Security of Health Information	HIPAA HITECH Electronic Health Records (EHRs) Medical Identity theft	<u>1 week</u>

Course Outline of Materials Covered

Critical Infrastructure Issues	Chemical Sector	1 week
(Homeland Security)	Commercial Facilities Sector	
	Communications Sector	
	Critical Manufacturing Sector	
	Dams Sector	
	Defense Industrial Base Sector	
	Emergency Services Sector	
	Energy Sector	
	Financial Services Sector	
	Food and Agriculture Sector	
	Healthcare and Public Health Sector	
	Information Technology Sector	
	Nuclear Reactors, Materials, and	
	Waste Sector	
	Transportation Systems Sector	
	Water and Wastewater Systems Sector	
	Possibility of Voting	
Cyber Investigations	Criminal vs Civil Investigations	<u>1 week</u>
	<u>E-Discovery Issues</u>	
	Cyberbullying and Sexting	
	<u>CAN-SPAM Act</u>	
	Child Pornography Statutes	
	Criminal Copyright Infringement and	
	Digital Millennium Copyright Act	
Electronic Privacy and Security	<u>Constitutional right to Privacy (never</u>	<u>1 week</u>
<u>in Employment</u>	explicitly stated, but)	
	Privacy Act of 1974 (Privacy Act)	
	Freedom of Information Act (FOIA)	
	Gramm-Leach-Bliley Act	
Responsibilities of "Network	Network burdens on security and	<u>1 week</u>
<u>Operators"</u>	changing role of law	
Trans-National Issues and	Issues that supersede US law	<u>1 week</u>
Additional Topics		
<u>Current Events</u>	Supplemental issues within current case law.	<u>2 weeks</u>

*Depending on the needs of the class or changes in the school year, the course outline is subject to change.
